AWS (S3, CloudFront, OpenSearch, Bedrock, CodePipeline...), Docker, GitHub Actions, CI/CD, Google Cloud Run

Testing
Playwright, Vitest, Cypress, Flutter test

LANGUAGES

SUMMARY

Fullstack Developer with 6+ years of experience building web and mobile apps, from UI, APIs and databases to testing and release. Since 04/2023 at GMO Financial System, building finance and lifestyle products for users in Japan on both web and mobile. Experienced in working with Japanese clients; English APTIS C1, Japanese JLPT N3. Goal: build and run useful apps for the Vietnamese market and grow them from zero to millions of users.

WORK EXPERIENCE

FULLSTACK DEVELOPER — 04/2023 – Present

GMO-Z.com Financial System VN (GMO Financial System)

A subsidiary of GMO Financial Holdings (listed on the Tokyo Stock Exchange), building systems for the group's services in Japan.

GMO Clinic Map — Web + Mobile app

Online healthcare platform connecting patients with clinics and hospitals: find medical facilities, book appointments online and order medicine from a doctor's prescription.

家計ボード byGMO (Kakeibo Board) — iOS app · GMO One Account

Household budgeting app: links bank accounts, credit cards, securities and e-money automatically; category charts, monthly reports, budgets and a ledger shared between partners.

1アカウント でんき＆ガス — Web

1Account's electricity and gas service: a market-linked electricity plan, 1–1.5% points back on bills, online sign-up.

Key responsibilities:

- Built web frontends with Next.js and backends with NestJS and Go on PostgreSQL.
- Deployed and ran services on AWS: S3, CloudFront, OpenSearch, Bedrock, CodePipeline and more.
- Built mobile apps with Flutter for iOS and Android.
- Read and analysed Japanese specifications; estimation, coding, unit tests, code review.
- Worked with BrSEs and the Japanese team to clarify requirements, fix issues and ship releases.

Next.js · NestJS · Go · PostgreSQL · Flutter · AWS S3 · CloudFront · OpenSearch · Bedrock · CodePipeline

FLUTTER DEVELOPER — 07/2022 – 04/2023

TEKO Vietnam Technology JSC

POS365 — Web + Mobile app · team of 12

Sales management software for retail shops, restaurants, cafés and karaoke venues.

- Built the new version of POS365 for web and mobile with Flutter, integrating the backend through RESTful APIs.

English: APTIS C1 (2026)

Japanese: JLPT N3 (2023)

INTERESTS

Basketball, coffee, travel.

- Wrote unit, widget and integration tests; brought automated test results into Jira.
- Estimation, coding, unit testing; code review with the team; performance tuning across platforms.
- Researched technical solutions for customer needs; the new version got positive feedback from users.

Flutter · Dart · RESTful API · integration_test · Jira

FULL-STACK DEVELOPER — 02/2020 – 02/2022

Sao Khue Co., Ltd.

- Built educational apps for Android and iOS; helped launch 3 of the company's 4 apps on the App Store and Google Play, with thousands of downloads.
- Delivered outsourcing projects for Japanese clients on schedule, with good feedback on quality.
- Took part in solution design; estimation, coding, unit testing; applied CI/CD; code review and knowledge sharing.

HR Dashboard Manager — 04/2021 – 03/2022

Japanese client XAIONDATA Inc. (outsourced) · Fullstack Developer · team of 3

Helps HR teams find and reach promising candidates faster: candidate search and automatic messages to many candidates at once.

- Built the UI with Vue.js and the APIs with FastAPI; designed and tuned MySQL queries.
- Used Elasticsearch to search and analyse candidate data.
- End-to-end tests with Cypress; automated web data collection with Selenium.

Vue.js · FastAPI · MySQL · Elasticsearch · Cypress · Selenium

Lingobee — 03/2021 – 02/2022

Sao Khue product · Frontend Developer (mobile) · team of 6

English learning app for school students that follows the Ministry of Education and Training's new curriculum, with games that make practice fun.

Flutter 2 · Firebase

Golf IM — 09/2020 – 03/2021

Sao Khue product · Frontend Developer (mobile) · team of 5

Golf course booking app with course management, a news feed and a shop.

Flutter · Firebase

SMSong — 06/2020 – 08/2020

Sao Khue product · Frontend Developer (mobile) · team of 3

Helps kindergarten children pick up English through songs and games.

Flutter · Firebase

HTCon 02/2020 – 06/2020

Client: Binh Minh Tutoring Center · Frontend Developer (mobile) · team of 3

Connects tutors and students: search for tutors or students, and manage classes, tutors and students.

Flutter | Firebase

On the mobile projects: feature development, code review and optimisation, bug fixing.

PERSONAL PROJECTS

Bronze Dawn 2026 · bronzedawn.pages.dev

Real-time strategy game in the browser: 4 ages, 33 unit types, 5 AI levels, peer-to-peer online play; also a native macOS version in Swift.

TypeScript | PixiJS | PeerJS | Swift | Playwright

Cocain 2026 · Web app

Gomoku, xiangqi, Go and chess online: Elo ranking, private rooms, 5 AI levels (the Go engine uses Monte Carlo tree search), game replays.

Next.js | Socket.IO | PostgreSQL | Drizzle | Playwright

Sòng Phẳng 2026 · PWA

Group expense splitter: works out who owes whom with the fewest transfers, VietQR codes, push notifications, installable as an app.

Next.js | PostgreSQL | Web Push | Google Cloud Run
